
Abrix The Robot Free Download [Patch]

Download >>> <http://bit.ly/2SPRiKl>

About This Game

During the cleanup work Abrix robot got stuck in a room full of containers, crates and other objects. Help him find a way out of the room.

Abrix the robot is an addictive puzzle game for everyone. Travelling on over 70 different rooms run into various obstacles whose removal will require to use your head.

Game features:

- 70+ different rooms.
- 5 levels of difficulty, from beginner's guide to extremely difficult.
- Editor of the rooms allows you to create your own puzzles.
- The opportunity to share your own rooms with your friends via the Steam Workshop.
- Saves in the Cloud Steam, achievements and Steam trading cards.
- The unique soundtrack and available DLC bonus tracks of electronic music composed by Ree-D.

The game provides over 40 hours of intellectual entertainment ranging from fairly simple puzzles, to the extremely difficult,

forcing the player to maximum effort. You can also create your own rooms with the editor, make them available in the Steam workshop and invite your friends to play. Challenge them and see if they solve the puzzles designed by you!

Fun Game, But the stats have to be almost maxed in order to do most of the skill checks. Italian and Portuguese people now look exactly alike.

10V10 would buy again. Best SMD game!!. Good Old Game. Not even just for the fact that you're severely hampered in multiplayer, having extra FOBs is also a requirement to have a high enough development grade for a bunch of the good weaponry for single-player use too. Konami being Konami it seems.

i can't start the game. the game always crash. i hope you give me the refund. too linear for my taste. Absolutely recommended!

The gameplay is tight, the music is amazing and the best: it's a bullet hell without any anime kitsch!

The visuals are unusual at first, but once used to it they show their strength with the reduced visual input. Keyboard and mouse work just as good as the gamepad controls.

The special weapons allow for some neat little customization tho more would have been nice.
The rogue-like mode is pretty interesting as well and a nice addition.

Did I mention the awesome soundtrack? Its trippin' balls!. \u2b50\u2b50\u2b50\u2b50. Fun enough for a clicker game, at least the Trump quotes gives it some flavor :) The gameplay is simple (no surprise there), just basically click and wait, and pop balloons to get boosts, buying unlimited boosters for \$0.50 is cheap enough and makes it a lot more fun to play.. Seems like a decent game, especially if you're hungry for a NES-style Dragon Warrior or Final Fantasy game, but the game suffers from too many major inconveniences. Afaik there's no gamepad support or any way to customize your keybindings, inventories are per-characters and you have to move items around a ton just to equip your party, menus are kinda messy and too deeply nested...

On top of that, I found that there is a total lack of direction in the game. You start in a castle, are given a quest and off you go. Exploring around only had me run into creatures that were way too hard for my level, so I'd rather not be given the chance to wander off, get lost and die, but that's just my preference.

Like I said, if you know what you're getting into and feel like jumping back into RPGs or the NES era with surprisingly _more_ inconveniences, this is for you.. I don't care for the story so much, nor the graphics, but it's very easy to get addicted to the roguelike elements and play for hours straight without realizing it.

Definitely worth a buy.
